

ALEXANDER NGUYEN

PRODUCTION ANALYST

alexandernguyenbl@gmail.com • [linkedin.com/in/alexandernguyenbl](https://www.linkedin.com/in/alexandernguyenbl) • [alvarie.github.io](https://github.com/alvarie) • Sydney, NSW

PROFESSIONAL SUMMARY

Production and Operations Analyst with a Bachelor of Information Technology and hands-on experience configuring, monitoring, validating and improving enterprise systems across automated distribution and digital eCommerce environments. Currently embedded with the Projects team at a newly automated Regional Distribution Centre — monitoring SCADA, WMS and TMS systems for smooth daily operational flow while supporting full UAT/WAT and go-live cycles, translating operational needs into structured test scenarios and driving defects to resolution alongside developers, testers and vendor engineers. Combines technical fluency in Python, SQL and analytics tooling with strong stakeholder engagement and structured documentation in JIRA and Confluence, operating effectively in fast-paced, ambiguous environments with minimal structure.

CORE SKILLS

Production & Operations: Systems Monitoring (SCADA / WMS / TMS), Real-time Order-flow Decisions, Fault Diagnosis, Automation-layer Support, Commissioning Support, Escalation Management, Production Planning (cover)

Systems & Testing: Requirements Gathering, Process Mapping, UAT/WAT Testing, Test Scenario Design, Defect Management, Release Cycle Support

Data & Analytics: SQL, Python, Pandas, Tableau, Google Analytics, KPI Reporting, A/B Testing, Dashboard Design, Data Visualisation

Enterprise Systems: SAP, WMS, TMS, VQC, SCADA, Vanderlande/Toyota HLC, Salesforce

Tools & Methods: JIRA, Confluence, Salesforce, SQLite, Microsoft Office (Excel), Agile/Scrum awareness

Core Strengths: Cross-functional Coordination, Documentation, Adaptability, Communication, Real-time Decision Making

PROFESSIONAL EXPERIENCE

Production Analyst — Primary Connect (Woolworths Group) 2025 – Present

- Monitor SCADA, WMS and TMS systems to ensure a coherent, smooth flow of daily operations, escalating and coordinating cross-functional responses to emerging issues in real time.
- Embedded with the Projects team across full User Acceptance Testing (UAT) and Woolworths Acceptance Testing (WAT) cycles for the opening of a newly automated Regional Distribution Centre, validating system behaviour against operational requirements prior to go-live.
- Translated operational and business needs into structured test scenarios spanning SAP, WMS, TMS, VQC and SCADA, partnering with developers, testers and vendor engineers to surface, triage and resolve defects through to acceptance.
- Served as operational point of contact for Toyota Automated Logistics (formerly Vanderlande) and their High Level Control (HLC) engineering team during commissioning, supporting fault diagnosis at the automation layer and capturing outcomes for cross-functional reference.
- Managed operational issues, documentation and knowledge sharing in JIRA and Confluence, partnering with shift teams and operational managers to maintain data integrity and track faults through to resolution.
- Stepped into the Production Planner role as cover, making real-time order-flow decisions, coordinating cross-functional response, and reporting to leadership throughout the shift.

Onsite Consultant — Adecco (onsite at Amazon) Jan 2024 – Jul 2024

- Acted as primary liaison between Amazon site management and contract associates, managing escalations and feedback in both directions.
- Conducted structured performance check-ins and one-on-ones, providing actionable coaching rather than tick-box reviews.
- Tracked workforce performance trends and surfaced operational insights to site leadership.

Digital Optimisation Analyst — Dyson Aug 2022 – Jan 2023

- Analysed traffic, user behaviour and campaign data in Google Analytics to identify conversion drivers on the Dyson Australia site and translate findings into recommendations.
- Built KPI dashboards and reporting frameworks that gave the local team at-a-glance visibility into campaign performance, replacing manual reporting cycles.
- Designed and ran A/B tests across key site touchpoints, converting results into specific, data-backed recommendations.
- Partnered daily with the APAC team on site-speed, mobile UX and SEO improvements for the Australian eCommerce platform.

Dyson Expert — Dyson Feb 2022 – Jan 2024

- Delivered consultative product demonstrations, matching customers to the right solution for their needs.
- Trained store staff across the full Dyson product range, covering technical knowledge and consultative sales technique.
- Consistently met or exceeded sales targets while prioritising customer experience.

Sales Advisor — H&M

Mar 2021 – Feb 2022

- Maintained shop-floor and visual-merchandising standards while supporting customers; onboarded and coached new staff on store standards and service practices.

Mathematics & English Tutor — Kumon Australia & New Zealand

Feb 2018 – Apr 2021

- Tutored primary and high-school students in mathematics and English, adapting the teaching approach to each student's individual learning gaps and strengths.

PROJECTS

- **Campaign Performance Dashboards** · *Google Analytics · Data Visualisation · Reporting*

Consolidated digital campaign performance into a single view, replacing manual reporting cycles and surfacing underperforming touchpoints without pulling raw reports.

- **Dyson AU Web Optimisation** · *Google Analytics · A/B Testing · SEO · KPI Dashboards*

Partnered with the APAC team on load-time, mobile-experience and search-ranking improvements; only changes that demonstrably moved KPIs were rolled out.

EDUCATION

Bachelor of Information Technology — Macquarie University

Higher School Certificate (HSC) — Bossley Park High School
